

My MRCGP [INT] – Dr. Tasneem Borhany

My name is Dr Tasneem Borhany and I passed my MRCGP INT in the year 2007. While preparing for my MRCGP [INT], I realized that this is an exam of high caliber and this motivated me more towards my ambition in general practice. After clearing it, I felt a change in my practice which became more evidence based and confident. I joined a government hospital and left Aga Khan University. Due to my MRCGP [INT], I dealt with the cases of family medicine in the OPD and my internal medicine colleagues would eagerly refer them to me. MRCGP [INT] made me stand tall among my peers as I finally decided to establish my own practice. My communication towards my patients reflected the training that I received while preparing for my MRCGP [INT]. I also joined community health committee and school health services. A breakthrough came when I was selected as an examiner for MRCGP [INT] South Asia and felt honored. My struggle to impart the concept of family medicine among masses and to educate patients regarding common health issues is moving on and I will continue to do so.

Thank You My MRCGP [INT].

Pictures of my practice and an educational lecture for children with eczema on better skin care and free test of their skin type at my practice. I have special interest in Dermatology
